Hosur | Tamil Nadu

EDUCATION

B.E. Computer Science & Engineering (Cloud Computing Specialization)

Adhiyamaan College of Engineering

Nov 2022 – May 2026

Hosur, Tamil Nadu | CGPA: 8.19/10

Higher Secondary Certificate (HSC)

Sri Saradha Vidya Mandir MHSS School

May 2022

Hosur, Tamil Nadu | 81.3%

EXPERIENCE

Trainee Data Engineering Intern

Diggibyte Technologies Private Limited

Jan 2026 – Present

Hosur, Tamil Nadu

- Built end-to-end ETL pipelines using Azure Data Factory and Databricks to ingest and transform large-scale datasets across Medallion Architecture.
- Transformed and validated raw data using PySpark, writing cleaned outputs as Delta tables to enable reliable downstream analytics.
- Optimized data ingestion workflows by implementing auto-detection logic in ADF, reducing manual intervention in file tracking and pipeline triggering.

Full Stack Developer Intern

Faslit Accor Private Limited

June 2025 – Aug 2025

Hosur, Tamil Nadu

- Built the Newsletter Module frontend using React.js including multi-section article listing, a dedicated reading page, and a 3D full-page flip animation for category filtering.
- Integrated Azure Email Communication Services to automate batch distribution to 200+ customers.
- Collaborated with backend teams using REST APIs to ensure seamless data flow between frontend components.

PROJECTS

Sales Data Pipeline — Medallion Architecture | [GitHub](#) | *Azure Data Factory, Databricks, PySpark, ADLS Gen2, Delta Lake*

- Built a dynamic ADF pipeline to auto-detect and ingest the latest sales CSV files into ADLS Gen2, eliminating manual tracking.
- Profiled, validated, and transformed datasets using PySpark, persisting results to the silver layer as Delta tables.
- Joined product, store, and sales tables in the Gold layer to produce a unified analytics-ready dataset used for business reporting.

Music Streaming End-to-End Pipeline | [GitHub](#) | *ADF, Databricks, PySpark, Delta Live Tables, Autoloader, ADLS Gen2, Azure SQL*

- Built metadata-driven incremental ingestion pipelines using CDC/watermark logic and Logic Apps orchestration for pipeline failure alerts.
- Processed streaming events using Delta Live Tables and Autoloader for continuous analytics updates.
- Diagnosed and resolved pipeline issues — duplicate loads, watermark drift, and empty file generation, improving overall reliability.

Hackverse – 3D Hackathon Management Platform | [GitHub](#) | *React.js, TypeScript, Appwrite, Three.js*

- Built a cloud-native full-stack hackathon management platform, featuring role-based dashboards for Participants, Judges, and Organizers with an immersive 3D navigation hub.
- Implemented a multi-criteria auto-scoring engine with real-time leaderboard ranking and Appwrite WebSocket-powered team collaboration.

TECHNICAL SKILLS

Languages: Python, SQL

Data Engineering: PySpark, Apache Spark, Spark Optimization, Azure Data Factory, Databricks, Delta Lake, Delta Live Tables, Data Build Tool (dbt), ETL Pipelines, Unity Catalog

Cloud & Storage: Azure, Oracle Cloud Infrastructure

Databases: MySQL, Azure SQL

Tools & Concepts: Git, Postman, Figma, REST APIs, Data Warehousing, Big Data Processing, Airflow, CI/CD, Agile/Scrum

CERTIFICATIONS

Oracle Cloud Database Services 2025 Certified Specialist | [Oracle](#)

Full Stack Web Development | [Udemy](#)

Cybersecurity Fundamentals | [IBM SkillsBuild](#)

Human Computer Interaction | NPTEL

SAWIT.AI Learnathon | [GUVI](#)

HACKATHONS & COMPETITIONS

- TNWISE Hackathon (Industry 4.0 – Agriculture Sector) — Qualified for Round 2
- Smart India Hackathon (SIH) 2023 & 2024 — Qualified in institutional rounds
- Idea Hack 1.0 – 2025 (Environmental Solution) — Progressed through 3 evaluation rounds

LEADERSHIP & EXTRACURRICULARS

- Office Bearer, ISTE Students' Chapter — Coordinated technical events, workshops, and skill-building sessions.
